1. Document Purpose

This document is prepared for **Casio Cafe PVT (LTD)** (hereafter referred to as "the Client"). The copyright of this document rests jointly with the developer **Athulya Herath** and **Casio Cafe PVT (LTD)**.

Casio Cafe is a modern cafe that offers a diverse range of premium coffee beverages including cappuccino, mocha, hot chocolate, and other specialty drinks. This M-commerce application aims to revolutionize the cafe's customer experience by enabling users to conveniently browse, order, and purchase their favorite beverages directly through their mobile devices. The platform will streamline the ordering process, reduce waiting times, and provide customers with a seamless and secure transaction experience, while enhancing operational efficiency for the cafe.

This document outlines our comprehensive understanding of the project requirements, the objectives of the M-commerce solution, the proposed methodology, key deliverables, technical specifications, and commercial aspects. It serves as the foundational blueprint for developing a robust mobile application that will bridge the gap between Casio Cafe and its customers, fostering enhanced engagement and satisfaction.

2. Client Brief

As per the client's requirements, Casio Cafe will serve two primary user groups except 'Admins' such as,

- **Customers:** The individuals who explore a variety of coffee beverages specialty drinks which suits for their taste preferences and budget. These user group will enjoy ordering their favorite beverages by browsing the menu, customizing their orders, and adding them to their cart via a secure payment option.
- **Cafe Staff/Management:** These user group includes authorized cafe employees and managers looking forward to manage cafe operations through the application. Staff will benefit from tracking order statuses, managing the product menu, monitoring sales performance, and reaching customers with real-time updates on their orders.

Along with that, client's key requirements includes,
Ease of Use: Simplified workflows for registration, menu browsing, order placement, and purchasing beverages with secure payments which is the transactions should be encrypted with multiple payment options.
Also, the M-Commerce application should alert the user regarding their order status with Real-Time Notification system.

Finally, it should integrate with Geolocation service such as Google Maps for cafe location display, navigation directions, and delivery tracking for pickup & delivery.

3. Objective

Purpose

To provide a distinctive mobile platform focused on facilitating coffee beverage transactions within Casio Cafe's marketplace. "Casio Cafe" will offer a diverse user base their needs by promoting the accessibility of premium coffee beverages with affordability and convenience.

Key Features and Functionalities

- Cafe staff can upload beverage images and set product title, description, and price for menu items.
- Simple and user-friendly profile for customers and cafe staff to manage their own activities.
- Secure payment gateway with multiple payment options and a real-time notification system which keeps users up to date regarding their order updates & checkouts.
- Location tagging for delivery and pickups by integrating with Google Maps.

User Experience (UX) and Interface Design

The M-Commerce application is focused on creating a seamless, user-friendly interface with clean and modern design practices to ensure a responsive coffee ordering experience like never before.

Security and Data Protection

For user authentications, secure user data storage, privacy laws compliances, the "Casio Cafe" M-Commerce platform will implement robust security protocols with its own customized security architecture.

Business Impact and Market Advantage

By implementing a dedicated mobile ordering platform for premium coffee beverages, "Casio Cafe" will offer a substantial competitive advantage and strengthen the online presence of the cafe's market growth.

4. Scope of Work

Funtional Requirements.

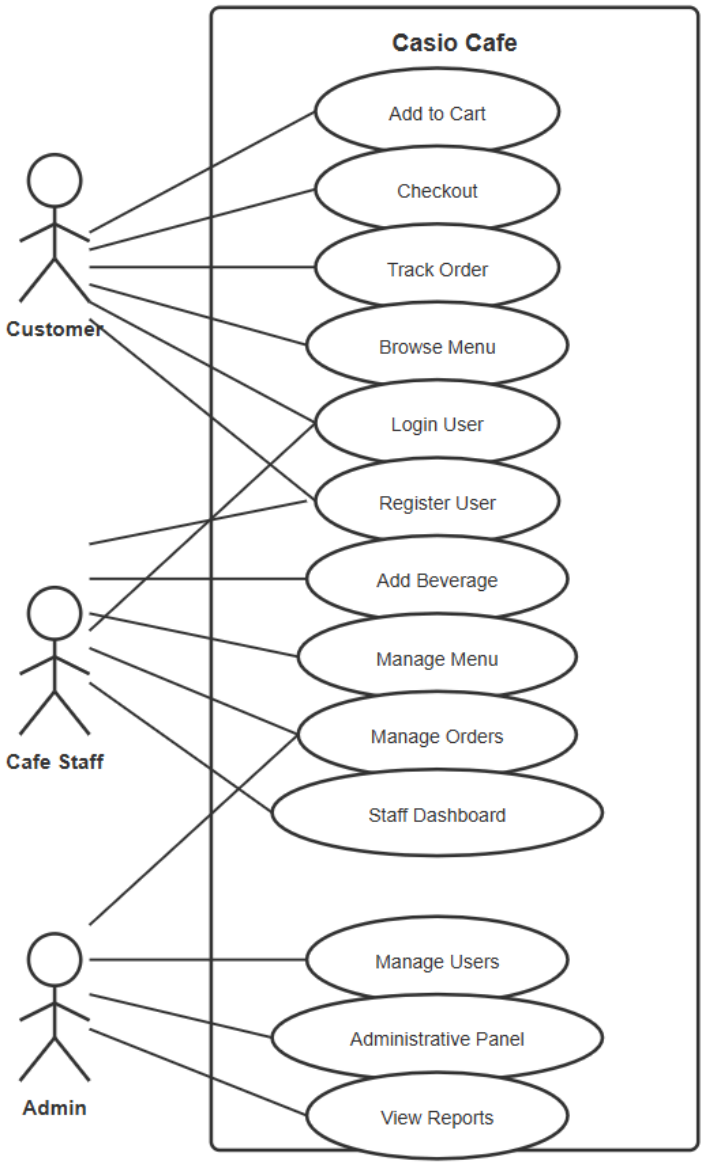

- User registration/login (email, password, social media).
- Menu browsing/searching (beverage categories, keywords, filters).
- Product listing (cafe staff for menu management).
- Single beverage view with detailed description and customization options.
- Shopping cart and checkout.
- Wishlist to keep user's favorite beverages.
- Order management (tracking, status updates).
- Payment gateway integration (multiple options).
- User Profile management.
- Option to access staff panel for cafe employees.
- Application Settings management side panel.
- Manage Menu option for Cafe Staff to add/edit/remove beverages.
- Real-time notifications (order updates, promotional offers).
- Camera & GPS Sensor controlling.
- Geolocation services (cafe location display, delivery/pickup location selection).

Non-Functional Requirements:

- **Responsiveness**: Cross-device compatibility (Android).
- **Performance:** Fast loading times, smooth navigation.
- **Scalability:** Ability to handle increasing users and data.
- **Security:** Secure authentication, data encryption.
- **Usability:** Intuitive interface with simple animations, easy navigation.

Use Cases:

- **Register User:** User registrations to create new account.
- **Login User:** User logs in to their account.
- **Add Menu Items:** Cafe staff adds new beverages to the menu.
- **Browse Menu:** Customer browses available beverages.
- **Add to Cart:** Customer adds beverages to their cart.
- **Checkout:** Customers complete their purchase on cart.
- **Track Orders:** Customer tracks the status of their order.
- **Manage Menu (Cafe Staff):** Cafe staff manages menu item listings.

Wireframes:

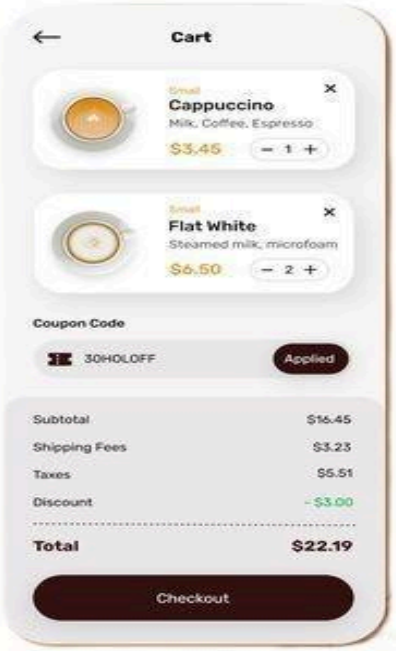

- **Home page:** Beverage Categories & Featured Drinks, Search bar, Bottom App nav bar.
- **Menu Listing:** Beverage image, description, price, customization options, "Add to Cart" button.
- **Shopping Cart:** List of beverages, total price, "Checkout" button.
- **Checkout:** Payment options, delivery/pickup address, Purchase confirmation.
- **Track Orders:** View Order ID and the status "Processing"/ "Preparing"/ "Ready for Pickup" or "Delivered".
- **Cafe Staff Dashboard:** Menu item listings, order management, sales statistics.

*Note: The following UI Wireframes are just a sample and may not be same as the final Application design.

Testing and Quality Assurance

Test the project before handing it over to the client including Unit, Integration, and System testing to ensure the developed M-commerce platform is bug-free and meets Casio Cafe's requirements. Testing will cover all core functionalities such as menu browsing, order placement, payment processing, real-time notifications, order tracking, and cafe staff dashboard operations to guarantee a seamless user experience.

5. Administrative Panel

The administrative panel will serve as the backbone for managing the platform including:

- **User Management:** View, edit, and manage user accounts (customers and cafe staff).
- **Menu Management:** Review listed menu items, manage beverage categories, add/edit/remove products from the menu.
- **Order Management:** View and manage orders, track order status, monitor delivery/pickup schedules.
- **Finance Management:** View Sales, Profit & Expenses, generate sales reports and analytics.
- **Content Management:** Manage application content, including promotional banners, featured beverages, and special offers.
- **Security Management:** Configure security settings, manage access control, and user authentication protocols.

6. Standardizations

To ensure quality and consistency, the following standards will be adhered to:

- **Design Standards:** Material Design guidelines for Android application with a warm, coffee-themed aesthetic.
- **Coding Standards:** Well-architected, maintainable code with best practices following Android development standards.
- **Testing Standards:** Automated and Manual testing protocols for all functionalities including menu browsing, ordering, payment, and notifications.
- **Security Standards:** Data encryption, secure API communications, and encrypted payment gateway integration.
- **Performance Standards:** Fast loading times, smooth navigation, and optimized app performance for seamless user experience.

- **Documentation Standards:** Clear and comprehensive technical documentation for both development and user guidance.

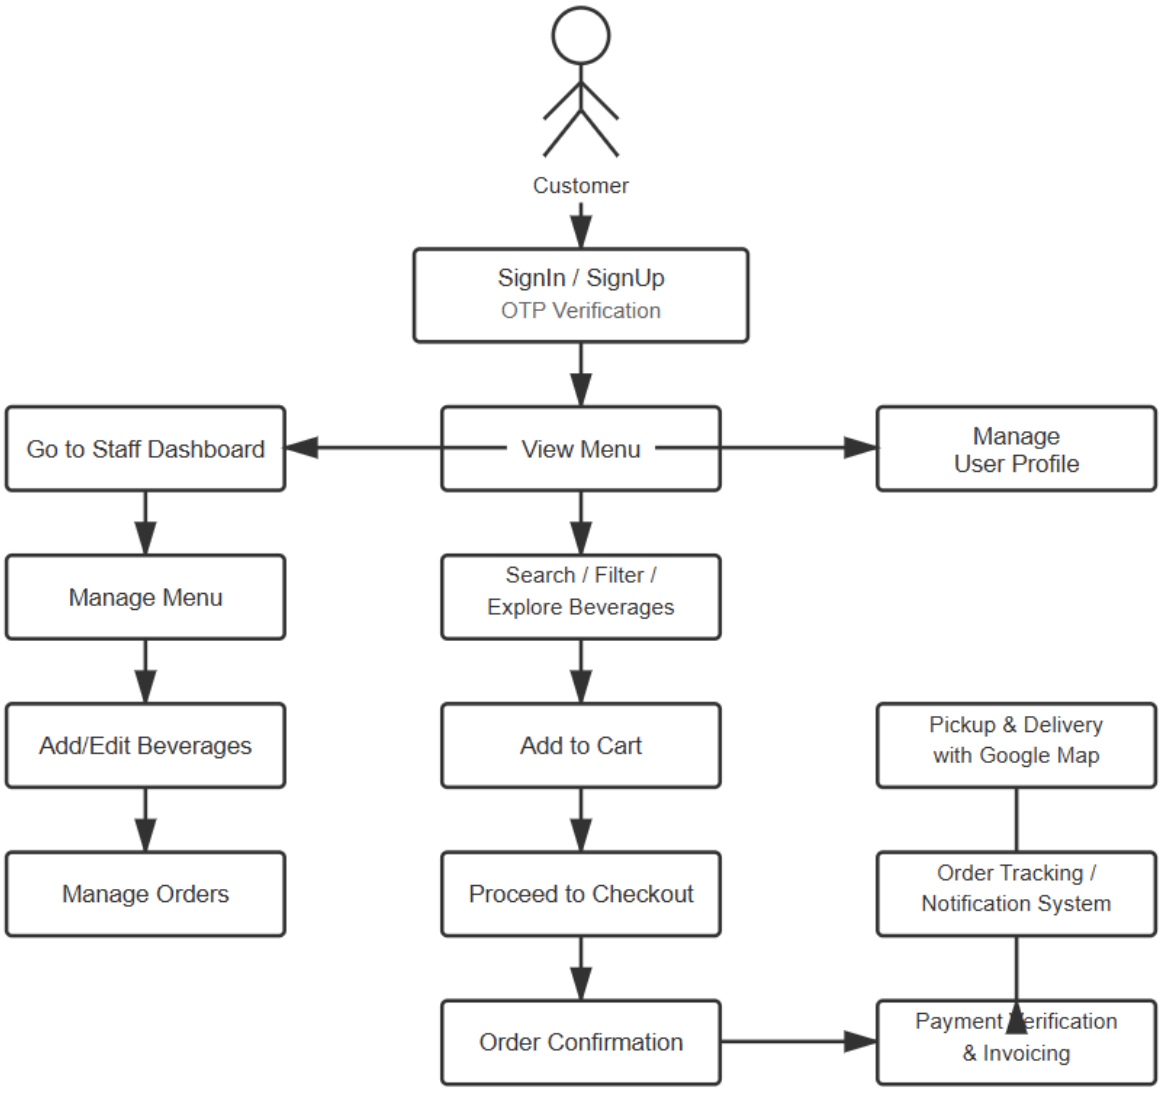

7. Delivery Schedule

Milestone	Timeline
Project Proposal Submission	Week 1 (7 Days)
Requirement Gathering	Week 2 (7 Days)
UX/UI Design	Week 3 (7 Days)
Development	Week 4 – Week 5 (14 Days)
Testing & Bug Fixing	Week 6 (5 Days)
Final Deployment	Week 6 (2 Days)

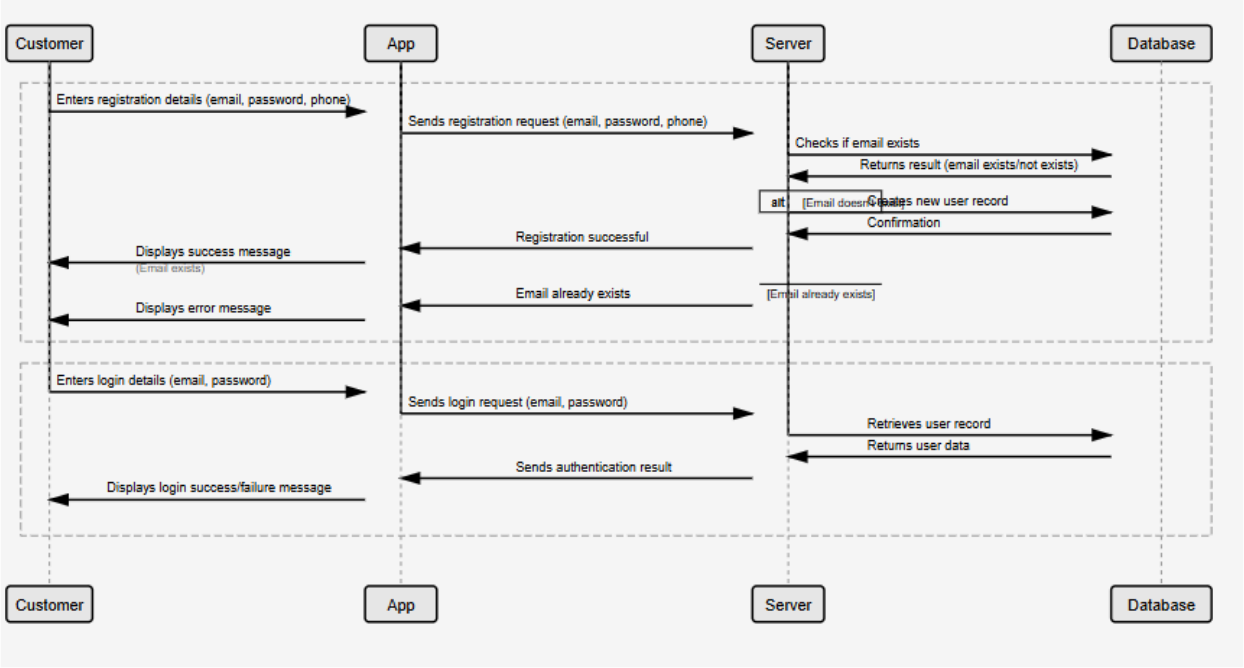

8. Process Flow

The process flow ensures a streamlined user experience for the stakeholders.
For the Project approach, Agile is used in the development process to ensure the right product is building the right way.

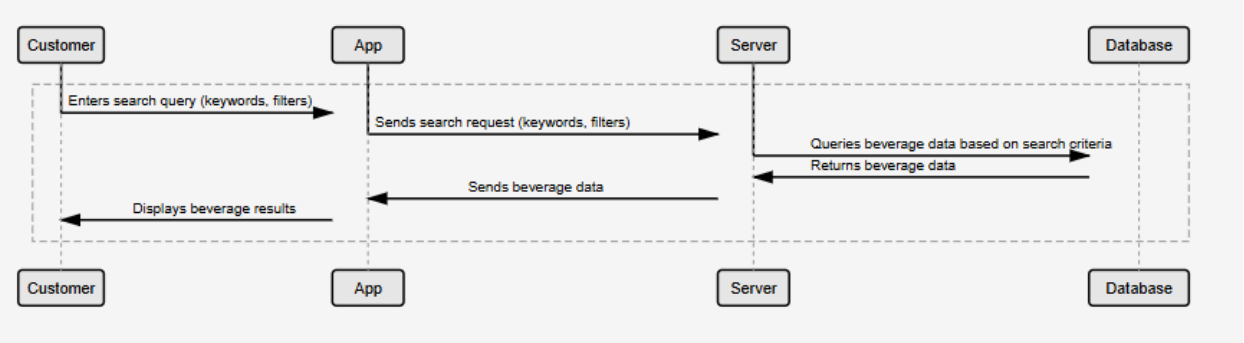

Here is the project flow diagram.

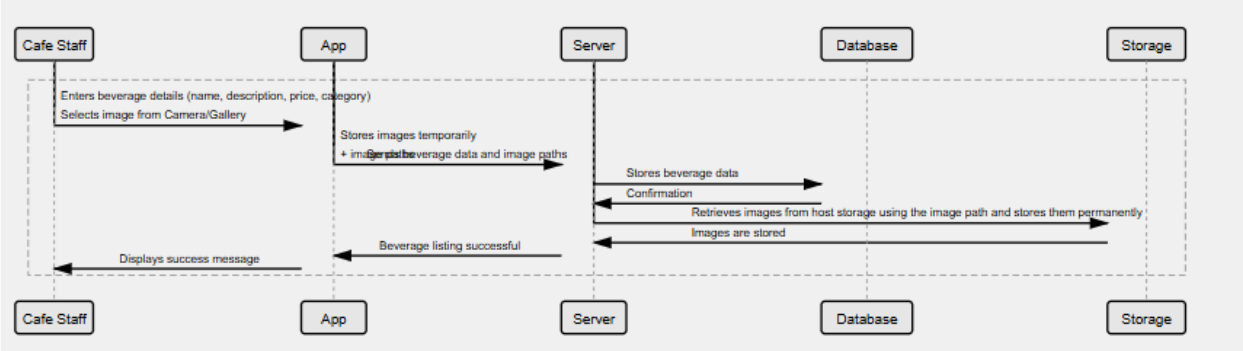

Data Flow for User Registration and Login

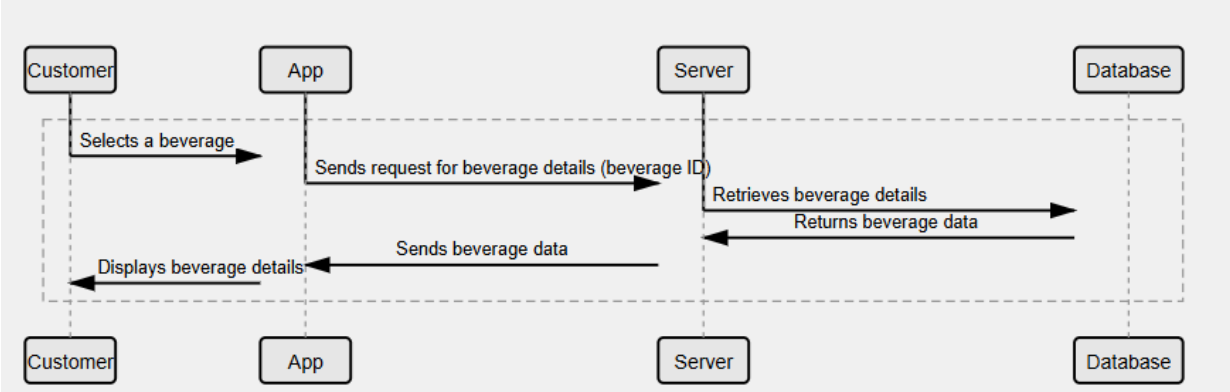

Data flow for Beverage Browsing and Searching

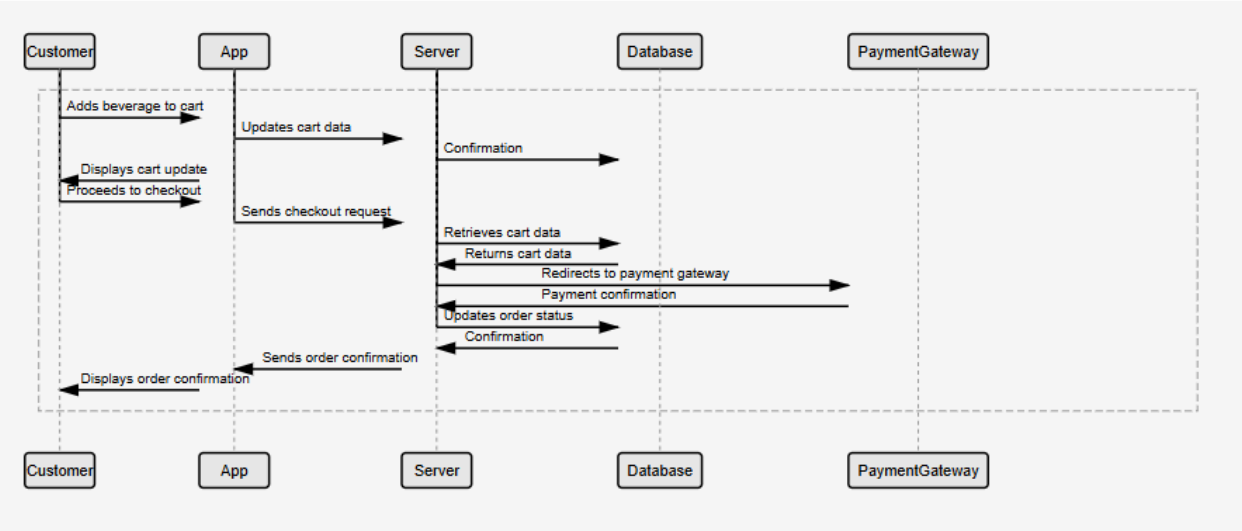

Data Flow for Add Beverages (Cafe Staff)

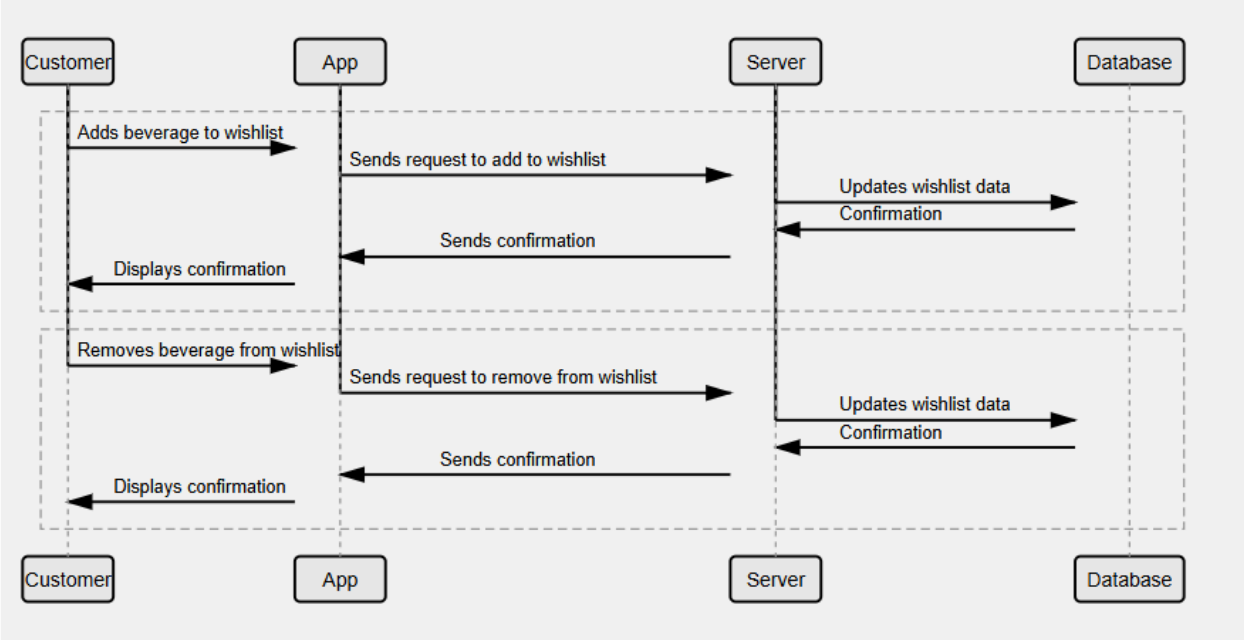

Data Flow for Single Beverage View

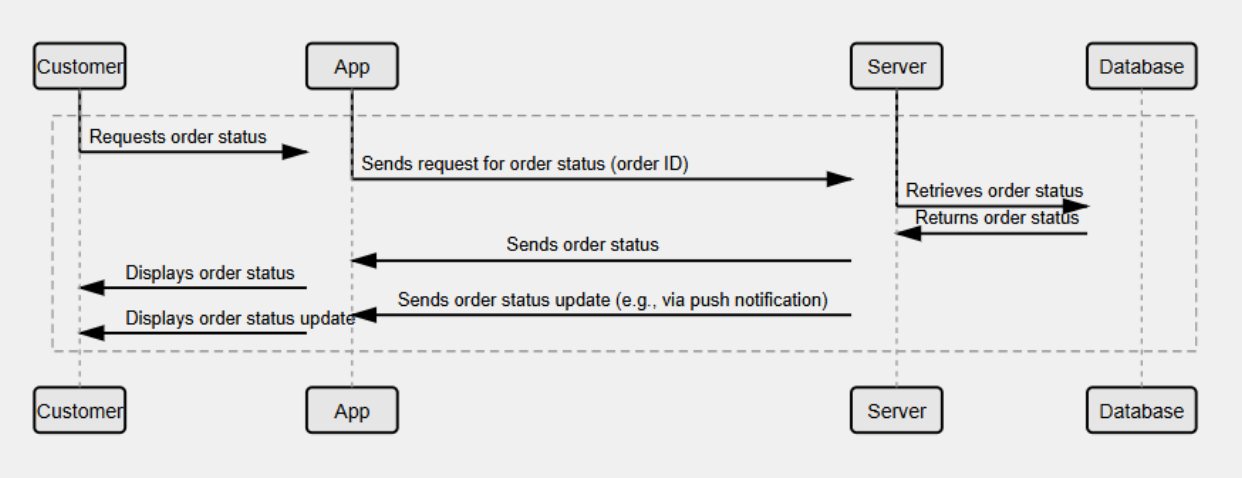

Data Flow for Oder Cart and Checkout

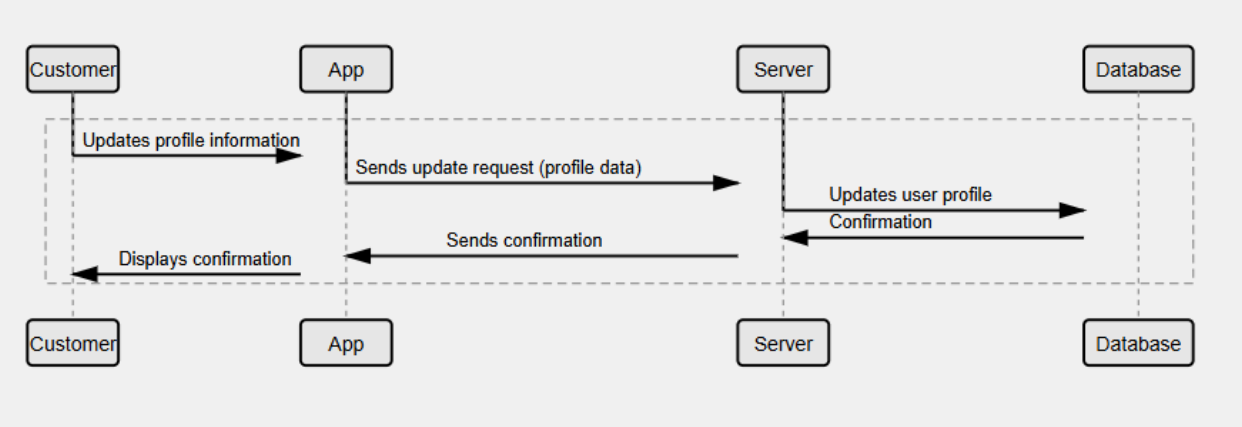

Data Flow for Wishlist

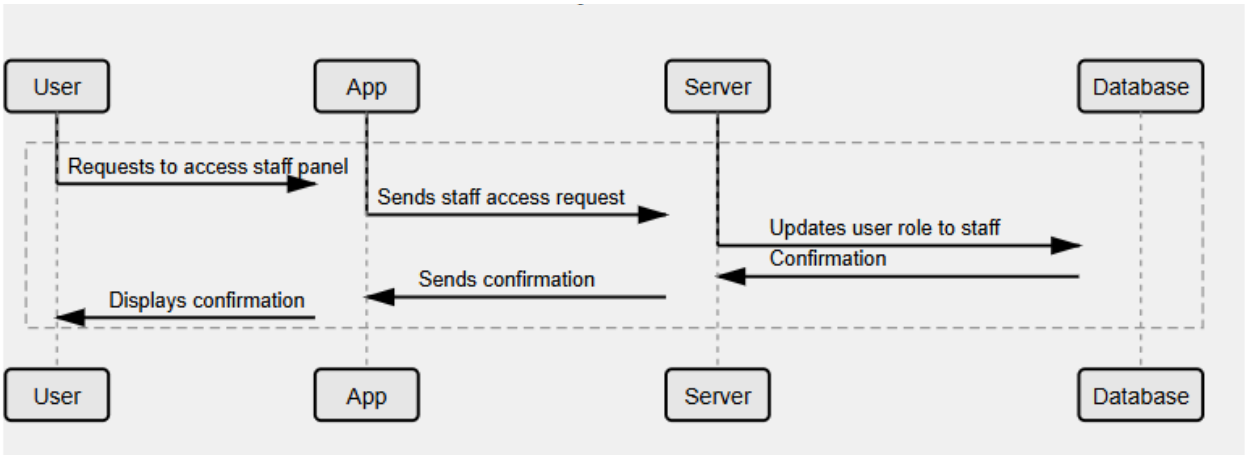

Data Flow for Oder Management (Tracking, Status Update)

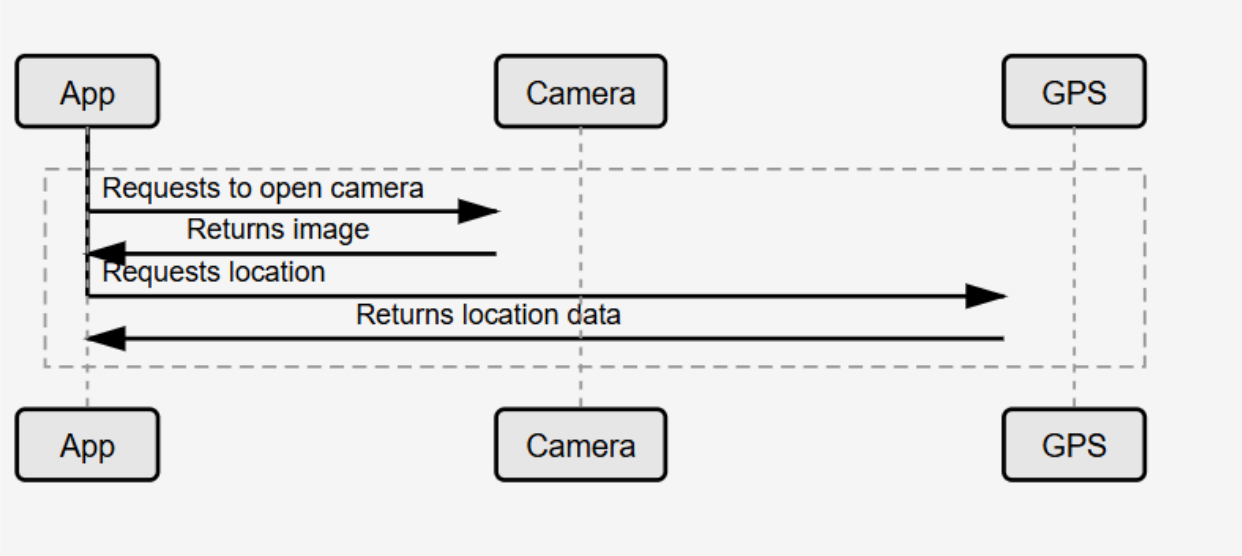

Data Flow for User Profile Management

Data flow for Option to Access Staff Panel

Data Flow for Camera and GPS Sensor Controlling

9. Requirements from Client

To facilitate the development and ensure project success, the client must provide:

- Branding assets, including Casio Cafe logo, banners, color schemes, and promotional materials.
- Menu information, including beverage names, descriptions, prices, categories, and high-quality product images.
- Cafe location details, operating hours, and delivery/pickup zones.
- Payment gateway credentials and merchant account information for secure transaction processing.
- Timely feedback on design prototypes, wireframes, and feature implementations.
- Regular availability for discussions on project progress, testing, and approvals.
- Access to cafe staff for user acceptance testing and training sessions.

10. Location of Work

Development is conducted remotely, by virtually collaborating with client by ensuring the transparency and maintaining effective communication.

11.Progress Reporting and Communication

- Weekly Reports: Summaries of tasks completed, challenges faced, and next steps.
- Virtual Meetings: Weekly online sessions to review milestones and address concerns.
- Instant Communication: Prompt updates on critical issues via email and messaging platforms.

12. Engagement Model

The engagement model outlines the terms of collaboration:

Intellectual Property Rights: Ownership of the developed software will be transferred to the client upon successful project completion.

Software Ownership: Full rights to use, modify, and distribute the application will be granted post-final payment.

Warranty and Maintenance: A six-month warranty period includes free bug fixes and minor updates

Terms and Conditions:

The Project include a clear definition of roles, responsibilities, and timelines to ensure smooth collaboration. All parties must adhere to the agreed-upon schedules and deliverables, with any changes requiring prior written approval. Confidentiality is mandatory, and no sensitive data shared during the project should be disclosed without authorization. The client must provide timely feedback, and the developer must ensure compliance with quality standards and deadlines. Payment terms are milestone-based, with full rights to the application transferred upon final payment. These terms aim to avoid misunderstandings and ensure mutual accountability.

Payment Schedule:

Payments will be milestone-based to ensuring clarity and mutual trust

Source Code Accessibility:

The complete source code and related documentation will be handed over at the project's conclusion *(*Conditions Applied)*.
